Dear madam,

I am excited to apply for the internship role at MYC Tech Academy. Having recently completed the 6-month Software Engineering Crash Course at MYC Tech Academy, I am eager to apply my fresh skills in HTML, CSS, JavaScript, React, Next.js, Node.js, React Native, WordPress, and UI/UX design to assist your team and gain hands-on experience in a dynamic tech setting.

In MYC Tech Academy, I had hands-on project-based learning that honed my technical expertise and deepened my passion for software development. For example, I built a responsive portfolio site using React and Next.js, developed an E-Commerce mobile app using React Native, and customized a WordPress blog with focus on user-centric design. These projects not only deepened my programming skills but also taught me to approach problems in innovative and collaborative ways—qualities I believe best fit with MYC Tech Academy's mission to foster innovation and excellence.

What excites me about this internship is the opportunity to work in a culture that values growth and innovation, which I experienced firsthand as a MYC Tech Academy student. I am most looking forward to working on real projects where I can use my skills in frontend and backend programming, UI/UX design, and yet learn from experienced professionals like yourself.

I am confident that my technical experience, problem-solving mindset, and interest in software engineering make me an ideal candidate for this internship. I would be happy to discuss how my skills and experience can be applied to the goals of MYC Tech Academy. Thank you for considering my application—I look forward to the chance to contribute to your team.
Sincerely,

JORDAN OMONDI OOKO.
